Projects

DZBAC • [Link](#)

January 2026 - April 2026

Developed a complete educational platform for university students using Flutter and Laravel. The application provides access to study materials, lectures, PDF documents, announcements, and subscription-based premium content. Built a RESTful API with Laravel and a cross-platform mobile application with Flutter, including authentication, user profiles, an admin dashboard, file uploads, and a secure subscription system.

Technologies

Flutter Dart Laravel PHP MySQL REST API Git

OptiPaie – Employee & Payroll Management System • [Link](#)

November 2025 - Present

Developed a desktop payroll and employee management system for Algerian companies. The application allows HR departments to manage employee records, payroll calculations, attendance, contracts, salary certificates, and administrative documents. Designed with a focus on performance, usability, and simplifying daily HR operations.
